SUMMARY OF TABLES.

In 1906 there were received 55,471 applications for mechanical patents, 806 applications for design patents, 205 applications for reissues of patents, 8,493 applications for registration of trade-marks, 844 applications for registration of labels, and 419 applications for registration of prints. There were 31,806 patents issued, including designs, 159 patents reissued, and 10,568 trade-marks, 709 labels, and 656 prints registered. The number of patents that expired was 23,360. The number of allowed applications awaiting the payment of final fees was 10,800, and the number forfeited for non-payment of the final fees 5,021. The total receipts were \$1,790,921.38, the expenditures \$1,554,890.20, and the surplus of receipts over expenditures \$236,030.18. The total balance to the credit of the Patent Office in the Treasury of the United States on January 1, 1907, was \$6,427,021.86.

In proportion to population more patents were issued to citizens of Connecticut than to those of any other State—1 to every 1,074. Next in order are the following: District of Columbia, 1 to every 1,180; California, 1 to every 1,331; Colorado, 1 to every 1,409; Rhode Island, 1 to every 1,414; New Jersey, 1 to every 1,451; Illinois, 1 to every 1,551; New York, 1 to every 1,565; Washington, 1 to every 1,583; Massachusetts, 1 to every 1,674; Ohio, 1 to every 1,918; Pennsylvania, 1 to every 2,090; Idaho, 1 to every 2,527; Montana, 1 to every 2,534; Michigan, 1 to every 2,541; Oregon, 1 to every 2,568; Oklahoma, 1 to every 3,062; Wyoming, 1 to every 3,084; Wisconsin, 1 to every 3,172; Indiana, 1 to every 3,192; Missouri, 1 to every 3,246; Iowa, 1 to every 3,258; Arizona, 1 to every 3,322; Minnesota, 1 to every 3,481; Utah, 1 to every 3,500; Nevada, 1 to every 3,527; North Dakota, 1 to every 3,753; Delaware, 1 to every 3,770; Nebraska, 1 to every 3,886; Maryland, 1 to every 3,927; Vermont, 1 to every 3,949; South Dakota, 1 to every 4,097; Kansas, 1 to every 4,386; Maine, 1 to every 4,598; West Virginia, 1 to every 4,723; New Hampshire, 1 to every 5,081; Alaska, 1 to every 5,767; Indian Territory, 1 to every 6,425; Florida, 1 to every 6,776; Virginia, 1 to every 6,944; New Mexico, 1 to every 6,974; Texas, 1 to every 6,976; Tennessee, 1 to every 7,901; Kentucky, 1 to every 8,041; Louisiana, 1 to every 8,424; Hawaii, 1 to every 9,058; Georgia, 1 to every 9,894. The fewest patents granted in proportion to the number of inhabitants were in the following States: South Carolina, 1 to every 18,110; Mississippi, 1 to every 15,513; Alabama, 1 to every 13,959; North Carolina, 1 to every 13,141, and Arkansas, 1 to every 10,929.

As to foreign patents, 991 were granted to citizens of

Germany; 852 to those of England; 461 to those of Canada; 314 to those of France; 133 to those of Austria-Hungary; 78 to those of Switzerland; 66 to those of Scotland; 61 each to those of Belgium and Sweden; 60 to those of New Zealand; 58 to those of Victoria; 38 to those of Transvaal; 34 to those of Italy; 28 each to those of Denmark and Russia; 26 to those of New South Wales; 25 to those of Mexico; 19 each to those of the Netherlands and Norway; 15 to those of Ireland; 11 to those of Japan; 9 to those of South Australia; 8 to those of Cuba; 7 to those of Queensland; 6 each to those of Brazil, Spain, and Western Australia; 5 each to those of Argentina, India, and Tasmania; 4 each to those of Chile and Haiti; 3 each to those of Cape Colony, Guatemala, and Natal; 2 each to those of Jamaica, Newfoundland, Portugal, Roumania, Turkey, and Tunis; 1 each to Algeria, Barbados, British Guiana, British West Indies, Nicaragua, Sierra Leone, and Venezuela.

A statement of the condition of the examining divisions of this Office at the end of the year has always been made in the Commissioner's yearly report to Congress, and it is a pleasure to state that the condition of these divisions at the close of the year 1906 was excellent. A report of the condition of these examining divisions at the close of the calendar year always suffers by the absence of the Examiners, who during the last half of December take the balances of leave to which they are entitled for the whole of the year, and these absences cause some drag in the work of the divisions at the very end of the year. For instance, our work reports show that nearly one-third of the assistants occupied in the examination of applications were absent during the last week of the year.

If the condition of each examining division is stated by the date of the oldest amended application, our reports show that such oldest amended cases were taken up for action after the date of receipt of the amendments in the following periods:

Within 15 days by 14 divisions, from 15 days to 1 month by 16 divisions, and from 1 month to 56 days in 9 divisions.

The average time in which such oldest applications in the several divisions were taken up for action was 25.41 days. This statement, however, being based upon the oldest dates that can be found in the several examining divisions does not show in the best way the times within which cases pending in the divisions do, in fact, receive action. Such times may be shown by taking the dates of the several Examiners' desks in each division and averaging these dates. This process develops the fact that such average times of the divisions are about one-sixth less than

the times obtained by the statement of the slowest dates, and in regard to the amended work the average time by Examiners' desks, and which fairly represents the times required in the various classes into which inventions are divided, was 21.02 days from the date of filing.

Applying both methods of statement to the new work of this Office, it may be stated that at the end of the year the oldest cases remaining in 29 of the examining divisions of this Office were within one month, and in the remaining 10 divisions were between one and two months. Not a single division of this Office exceeded this latter period. The average position of the divisions in their transaction of new work, marked by the slowest cases in each division, was 32.44 days, and by Examiners' desks showed that the average time required for action upon new cases was 27.12 days from the date of filing.

The weekly work report of January 15, 1907, exhibits, as usual, the recovery from the disturbing effects of Examiners' absences at the end of the year. By this report a much better statement of work conditions is able to be shown, and it appears that the examining divisions of this Office were taking up their oldest amended cases for action as follows:

20 divisions within 13 days, 16 divisions from 13 days to 1 month, and 3 divisions ranging from 1 month to 43 days, the average time being 19.16 days. Applying the same method of determining the average position of the different Examiners' desks in the divisions, this average time is reduced to 15.89 days.

As to the new work upon January 15, 36 of the 39 examining divisions were taking up their oldest cases for action within 29 days from the date of filing and the 3 remaining divisions in 36, 43, and 43 days, respectively. The average position of the examining divisions in this Office judged by the oldest cases is 28 days, and by the average time for the Examiners' desks it is 23.41 days.

No single statement can better express the general prompt and excellent condition of the work of this Office at the middle of the current month than the following: The total number of cases awaiting action upon January 15, 1907, is about 600 less than the receipts of new and amended cases during the first two weeks of this month.

In respect to the registration of trade-marks the condition of the work of this Office is very satisfactory. This work, which prior to 1905 amounted to about 2,500 trade-mark applications per annum, was very greatly increased by the liberal provisions of the statute of February 20, 1905, and by the end of that year there had been filed 16,224 applications for registration of trade-marks. During the year 1906 this number fell to 8,493, and it is thought probable that moderate annual increases in this amount may be expected. The work of the division having these matters in charge is well up to date. At the end of the year new trade-mark applications were taken up for action within 17 days and amended cases within one week from the time of filing.

There has been no time in recent years when the general condition of the work of this Office has been so good as at the present time, and this excellent condition has been brought about in part by the increased force given to this Office upon the 1st of July of the year just ended and also by systematic and generous efforts on the part of the examining corps and clerical force of this Office to improve the condition of the different divisions. I have been able to

divert to the purpose of examining applications for patents some Examiners hitherto occupied with other necessary work, but who were temporarily assigned to such examining divisions as were behind with their work for the purpose of bringing it up to date.

I feel it a duty to the Examiners of this Office to say that many members of this corps of 300 men have cheerfully worked overtime to this end and have surrendered leaves which in many cases were due to them and that without their personal efforts, which were in a high degree generous and self-sacrificing, the excellent condition of these divisions which I am now able to report would not have been reached for many months.

Attention is called to the growth of this Office during the last seven years. This is shown in the table included above, where it appears that the number of applications and caveats filed has increased in this period by 48.1 per cent and that the Letters Patent issued and trade-marks, prints, and labels registered have increased 57.9 per cent. Such regular increase follows very closely the increase in the number of employees in manufacturing establishments in the country, and the distribution of these applications among the different States and Territories is very nearly proportional to the number of employees engaged in manufacturing in such States and Territories. These facts show that the patent system is very closely related to the manufacturing enterprises of the country, and it is believed that this system has materially aided the manufactures of the country and that its prosperity is closely connected with theirs. For this reason the treatment of the United States Patent Office by Congress should be such as will allow it adequate growth and development and for this purpose to give it such increase in its working force and in the space allotted for the transaction of its business as is required by its growth.

It will also be necessary if this service is to be maintained in efficiency to check the frequent resignations of skilled Examiners by increasing their compensation somewhat above the present figures. In the last year resignations from the examining corps of this Office amounted to 32, distributed as follows: 2 Principal Examiners, 3 first assistants, 5 second assistants, 15 third assistants, and 7 fourth assistants. It will be seen that the largest number of resignations came in the grade of the third assistant, a grade in which an assistant may be supposed to have reached a capacity for effective and independent action in the transaction of the work of examining applications. At the present time the temptation to resign in order to accept employment with practicing attorneys or with large manufacturing establishments which have patent departments is not able to be met by any inducements which this Office can present in the way of salary. It should not be forgotten that there is a wide field of employment for the Examiners of the Patent Office outside of the Government service, and I believe that these outside inducements are more frequently presented to our Examiners than to any other group of technically-trained men in the Government service. In 1848 the salary of a Principal Examiner in this Office was \$2,500, at that time equaling the salary of a Representative in Congress. The pay of these Examiners has not been increased from that time to the present, while the cost of living has increased very considerably.

The space allotted to the Patent Office at the present time is insufficient for the economic transaction of its work

and for the health and convenience of its employes. The space allotted to some divisions of this Office is unfit for their purposes in dimensions, as well as in the matter of light and ventilation. If the Patent Office could occupy the whole of the building which it now occupies in part, it would no more than suffice for its necessities. I believe that an amount equal to the accumulated surplus derived from the operations of this Office, which is shown by this report to be a little less than six and one-half million dol-

lars, might well be expended in the building of a permanent satisfactory building adapted to the requirements of this service and worthy of a service which is recognized throughout the world as representing the American national characteristics more than any other branch of the Government service.

Respectfully submitted.

FREDERICK I. ALLEN,
Commissioner.
